Arjun Karlapati

+919989668210 karlapatiarjun@gmail.com arjun_k arjun1228 Hyderabad

PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming. Experienced in designing and developing scalable, secure applications through hands-on projects, with a focus on problem-solving and building real-world solutions. Currently strengthening technical skills through continuous learning, coding practice, and innovative software development.

EDUCATION

Anurag University Jul 2023 - May 2027
Bachelor of Technology in Computer Science and Engineering *CGPA : 8.68*

PROJECTS

AlumniConnect Portal | Github Website Dec 2025 - Present
Backend Developer

- **Architected** a full-stack MERN alumni-student networking platform with strict role-based access control across three roles (Student, Alumni, Admin), securing authentication via JWT (HTTP-only cookies) and Google OAuth 2.0.
- **Built** real-time direct messaging with Cloudinary-backed file/resume attachments, enabling alumni to share career resources and referrals directly with students, alongside a community feed featuring likes, comments, admin moderation, and shareable single-post URLs.
- **Engineered** an AI Career Mentor powered by Llama 3.3 70B via Groq Cloud, delivering resume analysis, mock interview coaching, and personalized skill-gap roadmaps to students.
- **Developed** end-to-end job listing and application workflows enabling alumni to post full-time, part-time, and internship opportunities for students to apply to with resume uploads and status tracking.

Technologies / Tools Used : *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, REST APIs, Google OAuth, Groq SDK, Cloudinary*

Animal Rescue Network | Github Website Feb 2026 - Jun 2026
Full Stack Developer

- **Designed** the end-to-end architecture of a civic rescue coordination platform bridging citizens, field volunteers, and administrators, translating a real-world animal welfare problem into a production-deployed, multi-role web system with independent operational workflows.
- **Constructed** a self-governing crowdfunding module where campaigns auto-seal upon crossing their donation target, deleted spam entries instantly subtract from the running total, and an admin-facing analytics panel visualizes contribution trends and goal progression via Recharts.
- **Deployed** a cloud-native media pipeline by channeling multi-image uploads through Multer directly into Cloudinary's CDN storing emergency rescue photos and mandatory volunteer completion proofs without any server-side disk dependency, keeping the backend fully stateless.
- **Enforced** strict security boundaries across the entire API surface using stateless JWT sessions persisted in HttpOnly cookies, bcrypt encrypted credentials, request schema validation, strict CORS origin whitelisting, and rate-limiting middleware on donation and auth routes.

Technologies / Tools Used : *React.js, Express.js, Node.js, Tailwind CSS, MongoDB, REST APIs, Vercel, JWT*

SKILLS

Programming Languages :	Python, C, Java, JavaScript, SQL
Frameworks & Libraries :	React.js, Node.js, HTML, CSS, Tailwind CSS, Express.js, JWT, REST APIs, Multer
Databases :	MySQL, MongoDB
Cloud & Tools :	VS Code, Postman, Git, GitHub, Claude Code, Vercel, Render, Cloudinary
Concepts :	Data Structures & Algorithms, Object-Oriented Programming, Authentication, Web Security

CERTIFICATIONS

- AWS Cloud Practitioner Essentials — Amazon Web Services(2026)
- Introduction to Database Systems — NPTEL, IIT Madras(2025)
- JavaScript Essentials — Cisco Networking Academy(2025)
- Claude Code In Action — Anthropic(2026)
- Oracle AI Foundations Associate — Oracle(2025)
- Learn AI and GenAI Basics — Microsoft(2025)

AWARDS & ACHIEVEMENTS

- Solved 150+ problems on LeetCode, demonstrating strong problem-solving and algorithmic thinking.

TechHack 4 Hackathon Runner-Up
ISTE

- **Collaborated** with a team under time constraints to design and build the AlumniConnect Portal, dividing frontend/backend responsibilities, conducting peer code reviews, and jointly debugging and testing critical authentication and messaging flows to ensure a stable, demo-ready product.

Visionova Hackathon 3rd Prize
CSI Chapter

- Designed **LMS** with course management and assignment tracking, integrating an embedded AI assistant using a LLM.
